## One of our Case Studies

Discover the results we achieved with our case study! We worked hard to reach our goals and now we want to share our successes with you. Read on to find out how we managed to grow our channel by over 100,000 subscribers in just 12 months.

After a year of work, we achieved:

**100k**  
Subscribers

**2,750\$**  
/ month)

**10h**  
Weekly

After only one year of work, we brought a channel from zero to 100,000 subscribers, proving that content from one nation can work in other parts of the world as well.

We were able to earn \$2,750 in a single month, which is particularly impressive considering we were operating in one of the least lucrative sectors of Youtube, namely entertainment. If you had been personally involved in our project, you would now have a salary of \$1,380 which can only increase!

To achieve 100,000 subscribers in one year, we spent less than an hour and a half per day!

This demonstrates that with consistency, dedication, and an effective strategy, you can achieve great milestones even by working just a few hours per week.

## Earnings

**50%**  
of the total

### € 1,000/month at the end of the first year and then exponential growth

Large YouTube channels are very profitable. We expect to reach the first 100,000 subscribers in less than a year per channel. This is because we already have confirmation that the videos we will publish have already worked in a specific country. The earnings will be very variable and difficult to predict with certainty, but expect to reach a minimum of €1,000 net after the first year of work, with the figure growing exponentially in the following months.

### Multiply your earnings with multiple channels

If you manage more channels, the estimates presented will multiply, reaching to earn several thousand euros already in the first year of work.

### Zero earnings at the beginning

To access monetization and generate profits, a YouTube channel must meet certain metrics, which will be satisfied after several months of production, depending on how quickly the channel will grow.

This means that at the beginning, the earnings for you and for us will be zero. After a few weeks, however, when the channel starts to grow, you will receive the first modest monthly compensation.

Only when the channel reaches large numbers will you earn very substantial amounts.

### You will start earning in a few weeks to a few months

Earnings will depend on the language in which you dub, the sector of the channel, the target audience of the channel, obviously on views and other metrics, so predicting how long it will take you to reach significant figures is impossible. However, since you will be dubbing videos that have already proven to be successful in some countries, the chances that the channel will grow quickly are very real.

### You earn half of the profits

Keep in mind that you will get 50% of the total earnings of the channel. The rest of the money will be invested to edit the dubbed videos, pay the rights of the content to the original creator, and cover administrative costs.
